EXPERIENCE

Interactive Associate | Fast Horse

Current / Minneapolis, MN

At FastHorse I spend my days managing, updating, testing, and building multiple client websites using primarily WordPress and Drupal. I am in charge of building and distributing client email campaigns, in-house animation work, and an ever growing list of odds and ends.

Freelance Web Design and Developer

As a freelancer web developer, I work with clients to design or redesign and develop websites using content managing systems such as Squarespace and WordPress. I thoroughly enjoy creating web content and working to organize site structure while paying close attention to user experience.

My favorite projects are re-platforming old, outdated sites and giving them new life.

Squarespace

Customer Care Advisor / Portland, OR

At Squarespace, I worked with users of the platform to troubleshoot issues and answer general how-to questions. I did this with effective and prompt email communication and problem solving. This job also resulted in an extensive knowledge of the Squarespace platform and templates which inspired me to go back to school to learn more about development.
